# Pranesh V

espp ranesh@gmail.com |8807149866 |https:// www.linkedin.com/in/pranesh-v-0451b0314| https://github.com/White-fang10

## PROFESSIONAL SUMMARY

Innovative Information Technology student with expertise in developing AI-driven applications and distributed systems. Skilled in Python and Java, I leverage data-driven insights to build impactful projects, including computer vision-based monitoring tools. Demonstrates strong leadership and analytical skills, eager to contribute to a collaborative engineering team and advance high-impact technical solutions.

## WORK EXPERIENCE

- Completed an internship in full-stack development, gaining hands-on experience with modern web technologies and frameworks.
- Engaged in projects centered around machine learning and artificial intelligence, applying technical skills to develop innovative solutions.
- Demonstrated proficiency in Python and Java while collaborating in dynamic team environments, contributing to AIdriven initiatives and enhancing technical expertise.

## EDUCATION

**V.S.B Engineering College • 2023 - Present**
B.Tech in Information Technology | Karur, Tamil Nadu | GPA: 7.8

**Veveaham Higher Secondary School • 2022 - 2023**
12th Standard | dharapuram ,tamilnadu

## SKILLS

**Technical:**

Python | Java | Artificial Intelligence | HTML | REACT | Computer Vision (CV) | Data Structures and algorithm

**Soft:**

Communication | Creative Problem-Solving | Innovative Thinking | Leadership | Adaptability

## PROJECTS

**CV & ML-Powered Automated Class Monitoring and Attendance And Engagement Monitoring System**
*Spearheading the development of a system leveraging Computer Vision and Machine Learning to automate attendance tracking and classroom monitoring.*

- Enhanced educational efficiency by implementing AI-driven solutions to streamline class management processes.

**Deep Fake (Awareness)**
*Conducted comprehensive research and delivered presentations on the ethical implications of AI technologies, with a focus on responsible AI usage.*

- Successfully increased awareness among peers on AI ethics, fostering informed discussions on responsible technology practices.

**DDoS Attack & Phishing Attack**
*Investigated cybersecurity vulnerabilities and developed solutions, demonstrating strong analytical and problem-solving skills.*

- Executed an in-depth analysis of cybersecurity threats, proposing effective mitigation strategies to safeguard digital infrastructures.

**Smart Energy Optimizer for EVs**
*Engineered a solution using AI to optimize energy consumption in electric vehicles, highlighting innovation in sustainable technology.*

- Contributed to advancements in sustainable technology initiatives, emphasizing AI-driven solutions to enhance energy efficiency in the automotive sector.

**Project Shield | Lead Developer (Team: Grid Guardians)**
***LT Line Breakage Detection System*** *Architected an intelligent disaster management platform for KSEBL that utilizes ESP32 sensors and ML-driven anomaly detection to identify broken LT power lines. Developed a cloud-powered dashboard with automated section isolation and real-time alerting via GSM/LoRa, bridging the gap between traditional hardware limitations and modern public safety requirements through a software-first innovation approach*

## CERTIFICATIONS

**NPTEL Java Certification** | NPTEL Big Data Analysis |Boord Data Science for beginers

## ACHIEVEMENTS

- **Innovated and patented a Space Debris Management System designed to track and mitigate orbital refuse using advanced computational models.**
- **Authored a patent for an automated debris monitoring framework aimed at enhancing satellite safety and sustainable space exploration.**
- **Developed and patented an Automated Attendance System leveraging facial recognition and computer vision to streamline classroom management.**
- **Engineered a contactless attendance solution using biometric identification and real-time data processing to eliminate manual entry errors.**
